Game was horrible then and is horrible now! Don't waste your money. It has crappy gameplay.. Thank you so much for this excellent game, Aurogon.

And I wish to thank, in particular, all the people who purchased this game. Hope you enjoy the game and the cultural connotations contained. To tell the truth, I have already played it for over 60 hours on the official game platform; and I strongly recommend Gujjian3 to every one of you and guarantee it will be a memorable experience.

Btw, be patient, english version is on the way, thx.. I would wait Hearts of iron 4 now.. really good game if you can get past it crashing every 5 seconds and your save files getting corrupted so you have to continuously start over. Sound and visuals are good, the story is great The gameplay, however, is special. With a semi-turn based puzzle combat system featuring rpg elements, this makes a really good game. Minor bugs and the required knowledge of English and some eastern culture may keep a lot of people from enjoying it, though. 6/10. LOVE IT!!!! [C]rashing. [S]mashing [X]ploding in the game? Whoooo talk about getting the pper hand from these [P]eople. You would Aim your train to another player's train and Smack it and go crazy. There is no tutorial but it's easy to figure it out once you get the hang of it. The Map is rather a bit small? But laying down tracks underground and through the mountains? Totally surprising!! I like it!! Best game there is! I enjoy it and will continue to enjoy it!!

The multiplayer is great! Having lots of laughs and editing and having a great time. Thank you for making this game. Keep up the great work! I recommend buying this game!!. A bit of a climbey ripoff, but with a nice twist. I like the way the rocks and ice look and i like climbing with the icepicks! it's ok for the price.. it could use some form of locomotion... This is my first ever review so...

WOW, it's all i can honestly say. Yeah at the time of writing this review ive played one hour but during that one hour i have faught and won many a battle, and used many a power up. The pick ups are what really make this game shine, the randomness of getting a minigun or an auto cannon can greatly affect how the game will play out later, the chance of getting the pick up which will allow you to become your worshiped plane is a CotW players dream. Another brilliant feature is the linear map design, which focuses the fight into key areas, but also provide multiple storeys of combat for you to fight upon, yet is obviously more suited to those who have acuiRED the bomb pick up.

At a bargain of \u00a31.74 during the summer sale i saved 75% on this baby, which is even batter.

Another great feature is the fact that this game is pretty much my entire life in a game, I too spend countless hours running about with my arms outstretched, making both plane and gun noises, running around with my cardboard plane on, and also jumping from worring hights. This has lead to me having to visit A&E on multiple occasions with fractures in my leg, i also ran in to a wall and fractured my cranium whilst aspiring to become a plane. But you see this is why this game is so adequate for people like me, i now no longer have to injure my self, i can merely play the game to get the release that i need, Which at the age of 43 and a half is quite difficult to achieve.

I just cannot wait for the sequel to this, just imagine jet fighters, using lock on rockets and other advanced weaponry to take down other plane enthusiasts, you just can't get enough of it can you. By using the word cult in the title those cheeky chappies at north of earth were just foreshadowing the popularity of this, though there isnt many of us that now play this, we are devout followers to the end.

I love you cult of the wind.. Well, simply put. It's one hell of a ride! It's worth the buy. and plus its cheap. but it sure should be worth more :x. I've got mixed feelings about the game:

The game is fun and it's super addictive. I used to play it a lot while in Beta.

Since I bought the game on the release day I wasn't able to find enough players to get a single game running :(

Unless you have a lot of friends who would like to play the game, I can't recommend it at this point.
Maybe the devs will find a way to bring this game back to life...

...one day.

It runs perfectly fine on a 2012 mac mini even though it says that the Intel HD 4000 chipset is not supported.. This game is a nice concept marred by awful execution and unrealistic expectations of the player. The way to score points requires you to be absolutely perfect most of the time if you want to get more than even 1 star, much less 5. The web-physics are also a little buggy, every time the web connect the spidy jitters around weirdly and loses momentum for no reason. This is a game simply not worth trying to finish, and that such a small percentage of players has even cleared the first world (which I did manage) should be a red flag that it's not just difficult, but flat-out broken.. The game is kinda nice, but it opens a console with an error message everytime I start it. If I close it, the game closes. I can go on if I leave the console open, but after a little while the commands don't respond anymore. I searched for people with the same problem on the forums, and though there are many with the same problem, there seem to be no solution.

A shame :/

UPDATE: The game had an update last week. I went to play full of hope, but old saves don't work anymore. And the commands still stop responding as before... I give up -_-'. Very fun game defiently recommend it on sale.

BTW if you're worried about the license key issue I put up a guide on how to fix it.. 10/10 great first person shooter game.. Very hard game. I didn't think driving would be this hard. If I did tests for my driving license, I think I would crash a few times. Overall a fun but stressful game. :(Fun litte breakout type game with funny characters. I would recommend getting it with a discount but the developer seems amazing and it is really cheap so go and support the dev !
